Reviews from Other Campers: 1) The following excerpts are from a campground description found in the "U.S. National Forest Campground Guide" web site (<http://www.forestcamping.com/index.htm>) : "...The campground, comprised of mature cedar and Ponderosa pines, has two unnamed loops. In general, this campground is best suited for tenters and small RVs. The loop to right of campground's entrance is more open, has better views, and sites that will accommodate RVs. The loop to the left is very shady with shorter parking aprons. Most tables and grilles are a short walk away from the parking apron. The ground cover is mostly pine needles and some grass. Privacy between camp sites is fair...The parking aprons are paved and most are same size..."
