Reviews from Other Campers: 1) The following excerpts are from a campground description found in the "U.S. National Forest Campground Guide" web site (<http://www.forestcamping.com/index.htm>) : "...The campground is composed of five loops (A, B, C, D, and E) meandering through alternating stands of Engelmann spruce, other conifers, Aspen and wildflower dotted meadows. The variety, size and shape of the conifers makes this a very attractive campground. Loops A, B, and C have the longer pull-throughs and vault toilets. Loops D and E have short pull-throughs and flush toilets. Loop C is the most open loop with only Aspen trees. The back-in parking aprons in the campground are consistent in length and will not accommodate large RVs. Although lightly traveled, State Rt. 39 is adjacent to the campground and traffic noise can be distracting. ...The parking aprons are paved. There is little variation in the length of the back-in parking aprons..."
