Reviews from Other Campers: 1) The following excerpts are from a campground description found in the "U.S. National Forest Campground Guide" web site (<http://www.forestcamping.com/index.htm>) : "...The campground is located on Bay Furnace at the southwest shore of Lake Superior. Composed of two loops ..., some sites overlook Lake Superior while others are near Furnace Creek. The campground is known for spectacular sunrises and sunsets, and an occasional display of northern lights. ... A delightful day trip is Grand Island. Access to Grand Island is via a 10-minute ferry ride. It was acquired by the Forest Service in 1989 and designated the Grand Island National Recreation Area...A 23-mile trail around the Island's perimeter provides fabulous views, moderate physical challenges, and quiet solitude to enjoy this unique NRA. No drinking water is available on the island. Netting and "industrial strength" insect repellent are recommended for the robust population of black flies and mosquitoes...The parking aprons are dirt and grass...Lake Superior offers most water sports, but there is no access from campground..."

Michigan
